Professional Summary

Detail-oriented and customer-focused IT professional with hands-on experience in technical support, desktop troubleshooting, infrastructure operations, and systems administration across Windows and Linux environments. Skilled in troubleshooting hardware, software, networking, and user access issues with knowledge of Active Directory, Microsoft 365, virtualization, networking, and PowerShell automation. Adept at supporting enterprise IT environments, troubleshooting connectivity issues, maintaining operational documentation, and delivering strong customer service with excellent communication and problem-solving skills.

Technical Skills

- **Infrastructure & Cabling:** Structured Cabling (Copper & Fiber), Workstation Deployment & Imaging, Hardware & Peripheral Setup, Device Configuration & Lifecycle Support
- **Operating Systems:** Windows Server, Windows 10/11, Linux (Ubuntu, Rocky Linux)
- **IT Support & Directory Services:** Desktop Support, Technical Troubleshooting, Active Directory, User & Group Management, Remote Desktop Support
- **Networking:** TCP/IP, DNS, DHCP, VLANs, Subnetting, Wi-Fi Troubleshooting
- **Microsoft & Enterprise Tools:** Microsoft 365, SharePoint, Outlook, Teams, OneDrive
- **Monitoring Tools:** HESK, Zabbix
- **Scripting & Automation:** PowerShell
- **Virtualization:** VMware vSphere, Hyper-V, Proxmox VE

Experience

HGS (Client: Metrolinx GO Transit & UP Express)

Dec 2025 - Present

Customer Relations Associate – Technical & Service Support

- Provide **front-line technical and service support** to Metrolinx customers via phone and digital channels in a high-volume, SLA-driven environment.
- Troubleshoot issues related to **ticketing systems, PRESTO cards, mobile applications, fare processing, and customer account access**.
- Log, track, and resolve incidents using **Microsoft Dynamics 365 (CRM) and SharePoint (SP Web)** workflows, ensuring SLA and quality compliance.
- Perform **initial issue diagnosis and root-cause analysis**, resolving known issues and escalating complex cases to Tier 2 teams with detailed documentation.
- Support customers accessing systems and services using **Cisco VPN and Zscaler**, assisting with secure connectivity and access-related issues.
- Utilize enterprise platforms including **BigCommerce, ByteMark, AgentX, and CCMS** to manage service requests, customer interactions, and operational workflows.

- Maintain **strict data privacy, security, and compliance standards** while handling sensitive customer information.

Mugil.io

Jul 2023 – Dec 2025

Tier 1 Technical Support

- Provided first-level **technical support** to end users via phone, email, and **remote support** tools.
- Troubleshoot and resolved issues related to **Windows, Microsoft Office**, email, **user accounts**, and remote access.
- Logged, tracked, and updated incidents and service requests using **ticketing systems**.
- Assisted users with **password resets, account lockouts, and basic network issues**.
- Monitored **system alerts** and reported issues to appropriate teams when required.
- **Escalated** unresolved or complex incidents to Tier 2 support following established procedures.
- Followed **knowledge base articles** and **standard operating procedures** to resolve common technical issues.
- Configured and **supported desktops, laptops**, and other **end-user devices**.
- Maintained accurate **documentation of incidents, resolutions, and user interactions**.
- Delivered professional **customer service** and **communicated** technical information clearly to end users.

Certifications

- **CompTIA Network+** - CompTIA (2025)
- **Azure Fundamentals** – Microsoft (2025)
- **Windows Server 2022 Administration** – Udemy (2025)
- **Fortinet Certified Associate** – Fortinet (2025)
- **Network Cabling Specialist(Copper & Fiber)** – Delmi Training Institute (2024)
- **Google IT Support Specialist** – Google (2021)

Projects

Proxmox Homelab & Web Services Deployment

- Built and maintained a **Proxmox VE homelab** simulating enterprise IT environments.
- Configured **Windows and Linux servers, including Active Directory, DNS, DHCP, and virtual networking**.
- Deployed and secured **WordPress** on Linux with **SSL/TLS and DNS configuration**.
- Implemented **Zabbix monitoring**, tested backup strategies, and practiced high-availability scenarios.

Capstone – Enterprise IT Infrastructure Deployment

- Designed and implemented a **multi-site Linux and Windows Server infrastructure** using **VMware vSphere**.
- Configured **Active Directory Domain Services (AD DS)** for centralized authentication.
- Deployed enterprise services including **Zabbix monitoring, Zimbra mail server, HESK ticketing system, OwnCloud, and WordPress**.
- Automated incident workflows by integrating **Zabbix alerts with HESK ticket creation**.
- Configured **DNS, DHCP, and firewall rules** to ensure secure inter-network communication.

PowerShell Automation & IT Operations

- Developed **PowerShell automation scripts** for AD user onboarding, group assignment, and home directory setup.
- Implemented **logging, error handling, and email notifications** to support IT and HR workflows.
- Built GUI-based PowerShell tools for **IT inventory management and reporting** with CSV/PDF export.
- Reduced manual provisioning time and **improved operational efficiency through automation**.

Apache Guacamole Remote Access Solution

- Deployed **Apache Guacamole** on a headless Ubuntu server for browser-based remote desktop access.
- Configured **RDP for Windows and SSH for Linux systems** to enable cross-platform remote support.
- Secured access using **authentication controls** and **reverse proxy** configuration.
- Delivered a **clientless remote support solution** without requiring software installation on end-user devices.

Education

- **Conestoga College**
Graduate Certificate in Applied Network Infrastructure and System Administration (2024 - 2025)
- **A.V.C College of Arts and Science**
Bachelor of Computer Science (2019 - 2022)
